

G04. I am purchasing/supplying lifting equipment, what documentation should I expect to receive/send with it?

The term 'lifting equipment' is defined by Use Legislation to describe work equipment for lifting or lowering loads. This also includes any attachments used for anchoring, fixing or supporting it.

There are different definitions in supply and use legislation. This also applies to lifting accessories that have slightly different definitions as well.

To this end the specific documentation would depend on the type of lifting equipment being supplied. The LEEA 059 (1-6) Guidance to Documentation and Marking - series specifies the specific documentation required for each type.

These guidance documents can be downloaded by members for free from the LEEA Library - [LEEA Library | Documents](#)

Please note: The content of the guidance in these frequently asked questions is provided for general information only. Whilst they are intended to represent a standard of good practice, they have no legal status and compliance with them does not exempt you from compliance with any legal requirements. Although we make reasonable efforts to provide accurate guidance, we make no representations, warranties or guarantees, whether express or implied, that the content of the guidance given in these frequently asked questions and our interpretation of the requirements given is accurate, complete or up-to-date. It is therefore responsibility of those with specific duties under the legislation to ensure that they fulfil the obligations imposed on them.
